# Shape Bubble Wands

Students will make shape bubble wands using straws and pipe cleaners.

## Materials:

Straws  
Pipe cleaners  
Bubble solution  
Bucket

## Directions:

1. Decide if you would like to make a triangle, square, or diamond.
2. If you want to make a triangle, cut a straw into thirds. Then push the pipe cleaner through each straw segment. Form a triangle shape and twist the pipe cleaner ends together tightly to close the shape.
3. If you want to make a square, cut the straw into fourths. Then push the pipe cleaner through each straw segment. Form a square shape and twist the pipe cleaner ends together tightly to close the shape.
4. If you want to make a diamond, cut the straw into fourths. Then push the pipe cleaner through each straw segment. Form a diamond shape and twist the pipe cleaner ends together tightly to close the shape.
5. Dip your shape into a bucket filled with bubble solution. Blow gently or wave the shape in the wind to make bubble shapes.
